Seventh Annual Conference 2005 at Iowa State University

30 September-1 October 2005
Iowa State University, Ames, IA, USA

The theme of the conference will be "Language Testing and Technology". Our Call for Papers invites argumentative papers for theoretically orientated presentations, or the presentation of completed research and, for graduate students only, Works in Progress, which provides an opportunity for the presentation of thesis, dissertation, or other work in progress and research that is being planned. At the Work in Progress session the students will present their work informally while sitting at tables visited by interested participants who can circulate and ask questions and provide comments to a number of presenters during the session.

A special feature of this particular MwALT meeting is that it will be held in conjunction with the third annual Conference on Technology for Second Language Learning, focusing on various aspects of CALL development and research. The collaboration of these two conferences at Iowa State will provide opportunities for the language testers to consider new viewpoints on technology and language learning and the TSLL folks to learn more about assessment. Participants will be able to register for both conferences at a reduced rate.

Professor **J. Charles Alderson**, Lancaster University, will present the keynote talk to the joint MwALT/TSLL participants.

The MwALT Call for Papers can be found at:http://www.public.iastate.edu/~apling/conf/mwalt/2005/cfp.html
